PROFILE SUMMARY

Final-year Computer Science Engineering student specializing in backend Python development — REST API design, relational databases, and authentication systems. Built and deployed a production-style authentication service using FastAPI, PostgreSQL, and JWT with automated testing and containerized deployment underway. Following a structured, self-directed roadmap toward FastAPI, PostgreSQL, Redis, and Docker, reinforced by hands-on job simulations in REST API integration and debugging. Seeking a backend/software development internship.

TECHNICAL SKILLS

- **Programming Languages:** Python (Core), C (Basics)
- **Backend Development:** FastAPI, REST API Design, JWT Authentication
- **Databases:** PostgreSQL, SQL, MongoDB, DBMS Concepts
- **Tools & Platforms:** Git, GitHub, Docker, VS Code, Render, Neon
- **Core Competencies:** Problem Solving, Backend Logic Building, Debugging, Analytical Thinking

ACADEMIC / PERSONAL PROJECTS

Code for all projects: github.com/deoreparth700-design

Auth Service | *Python, FastAPI, PostgreSQL, JWT, Docker/Render*

- Built a secure RESTful authentication service with user registration, login, JWT access tokens, refresh tokens, and protected endpoints using FastAPI and PostgreSQL.
- Implemented bcrypt password hashing, JWT validation middleware, refresh-token rotation, and login rate limiting to strengthen authentication security.
- Developed a minimal HTML/CSS/JavaScript frontend for signup, login, and authenticated access; deployed on Render with PostgreSQL hosted on Neon.

Live: <https://github.com/deoreparth700-design/auth-service.git>

Alumni Portal — Final Year Project | *React, Node.js/Express, MongoDB Atlas*

- Designed and built a full-stack Alumni Portal for SOET connecting alumni, students, and the college, including registration, profile management, job/internship postings, and event updates.
- Authored complete system design documentation — DFDs, UML use-case diagrams, and ER diagrams — before implementation, translating requirements into a working relational data model.

EDUCATION

Bachelor of Engineering, Computer Science Engineering

2023 – 2027

School of Engineering and Technology, MGM University, Chh. Sambhaji Nagar, Maharashtra | CGPA: 7.59

Higher Secondary Certificate (XII) — Maharashtra Board | 2023

Secondary School Certificate (X) — Maharashtra Board | 2020

CERTIFICATIONS & TRAINING

- **Forage Job Simulations:** JPMorgan Chase & Co. — Software Engineering (Kafka & H2 integration, REST API); Datacom — Software Development (root-cause analysis, debugging); Quantum — Software Engineering

ADDITIONAL INFORMATION

- **Languages:** English, Hindi, Marathi
- **Areas of Interest:** Backend Development, REST APIs, Database Systems
