PROFESSIONAL SUMMARY

Final-year Computer Science Engineering student specializing in backend software engineering, with hands-on end-to-end product-building experience across API design, databases, security, and deployment. Built a production-style authentication service (FastAPI, PostgreSQL, JWT) spanning the full engineering lifecycle — from data modeling and REST API design to security hardening and cloud deployment — plus a full-stack platform covering both frontend and backend. Following a structured, self-directed roadmap toward FastAPI, PostgreSQL, Redis, and Docker, reinforced by hands-on REST API job simulations. Seeking Software Engineer / Backend Engineer / Product Engineer internship and entry-level roles.

TECHNICAL SKILLS

Languages: Python (Core), SQL, C

Backend & APIs: FastAPI, REST API Design, JWT Authentication, Authorization & Access Control

Databases: PostgreSQL, MongoDB, Relational Data Modeling, DBMS Concepts

Frontend (integration-level): HTML, CSS, JavaScript, React

Tools & Platforms: Git, GitHub, Docker, Render, Neon, VS Code

Practices: System Design Documentation, Debugging, Problem Solving, Analytical Thinking

PROJECTS

Authentication Service — End-to-End Backend System | *Python, FastAPI, PostgreSQL, JWT, Docker, Render*

- Designed and built a secure, production-style RESTful authentication service end-to-end, covering user registration, login, JWT access/refresh tokens, and protected endpoints.
- Engineered the security layer with bcrypt password hashing, JWT validation middleware, refresh-token rotation, and login rate limiting.
- Built a lightweight HTML/CSS/JavaScript frontend for signup, login, and authenticated access, connecting the full flow from UI to database.
- Deployed the service end-to-end on Render with PostgreSQL hosted on Neon, owning the path from code to a live, running system.

Repo: github.com/deoreparth700-design/auth-service

Alumni Portal — Full-Stack Final Year Project | *React, Node.js/Express, MongoDB Atlas*

- Designed and built a full-stack platform (SOET) connecting alumni, students, and the college — covering registration, profile management, job/internship postings, and event updates.
- Authored complete system design documentation (DFDs, UML use-case diagrams, ER diagrams) before implementation, translating requirements into a working relational data model.

EDUCATION

Bachelor of Engineering, Computer Science Engineering
School of Engineering and Technology, MGM University, Chh. Sambhaji Nagar, Maharashtra | 2023 – 2027 | CGPA: 7.59

Higher Secondary Certificate (XII) — Maharashtra Board
2023 | 56%

Secondary School Certificate (X) — Maharashtra Board
2020 | 89%

CERTIFICATIONS & TRAINING

- Job Simulation: REST API Integration & Debugging — JPMorgan Chase & Co. (Forage)
- Introduction to SQL — Simplilearn SkillUp, 2026

ADDITIONAL INFORMATION

Languages: English, Hindi, Marathi
Areas of Interest: Backend Development, REST APIs, Database Systems, Full-Stack Product Engineering
